

1. Instalowanie bibliotek

npm install pg redis

```
{
  "name": "product-dashboard-backend",
  "version": "1.0.0",
  "main": "src/server.js",
  "scripts": {
    "start": "node src/server.js"
  },
  "dependencies": {
    "express": "^4.21.2",
    "lodash": "^4.17.21",
    "pg": "^8.20.0",
    "redis": "^5.12.1"
  }
}
```

Compose.yml

docker compose up --build

//testy

curl http://localhost:8080/api/items

curl <http://localhost:8080/api/stats>

docker compose down //zatrzymanie

docker compose up //uruchomienie

docker compose down -v //zatrzymanie z wyzamiem danych

docker compose up

curl http://localhost:8080/api/items

(dodanie produktów)

Curl <http://localhost:8080/api/items>

docker compose ps

curl http://localhost:8080/api/items

curl <http://localhost:8080/api/stats>

```
docker compose --profile tools run --rm db-seed
```

```
curl http://localhost:8080/api/items
```

Artefakty

5.

```
docker compose ps
```

```
6-cache-1      redis:7-alpine      "docker-entrypoint.s..."  cache    56 minutes ago  Up 56 minutes (healthy)
6379/tcp
6-db-1         postgres:16-alpine  "docker-entrypoint.s..."  db       56 minutes ago  Up 56 minutes (healthy)
5432/tcp
```

6.

Dodanie produktu

Products

- persystencja

```
docker compose down //
```

```
docker compose up //
```

```
curl http://localhost:8080/api/items
```

```
[{"id":1,"name":"persystencja","price":"0.00"}]
```

7.

curl <http://localhost:8080/api/items>

curl http://localhost:8080/api/stats

```
{"count":1,"cache_hits":0,"instanceId":"node-97518"}
```

curl http://localhost:8080/api/items

curl http://localhost:8080/api/items

curl http://localhost:8080/api/items

curl <http://localhost:8080/api/stats>

```
{"count":1,"cache_hits":2,"instanceId":"node-97518"}
```

8.

docker compose --profile tools run --rm db-seed //uruchamia kontener tylko db-seed z
compose.yml

curl http://localhost:8080/api/items

```
[{"id":1,"name":"Widget","price":"9.99"}, {"id":2,"name":"Gadget","price":"24.99"}, {"id":3,"name":"Doohickey","pr  
ice":"4.49"}]
```
